## **DETAILED ACTION**

### ***Response to Arguments***

1. The Examiner notes the cancellation of claims 30 and 42.
2. Applicant's arguments, see page 12 of Applicant's Remarks, filed 04/23/09, with respect to the objection of claims 45 and 47 have been fully considered and are persuasive. The objection of these claims has been withdrawn since informalities have been corrected.
3. Applicant's arguments, see page 12 of Applicant's Remarks, filed 04/23/09, with respect to the 35 USC 101 rejection of claims 1-29, 34-41, 45 and 47 have been fully considered and are persuasive. The 35 USC 101 rejection of these claims has been withdrawn since. Further, with reference to claims 1 and 10, these claims now recite a statutory device/apparatus claim. With reference to claims 23-29, 41, 45 and 47, these claims now positively tie adjusting texture step to another statutory category via the graphical user interface device.
4. Applicant's arguments, see pages 12-14 of Applicant's Remarks, filed 04/23/09, with respect to the 35 USC 103 rejection of the claims have been fully considered and are persuasive. The 35 USC 103 rejection of the claims has been withdrawn since amendments to the claims have overcome the cited prior art. Note, a further prior art search has yielded no addition, as per prior art rejection purposes, results.

### ***Allowable Subject Matter***

5. Claims 1-29, 31-41 and 45-48 are allowed.

The following is an examiner's statement of reasons for allowance:

In reference to claim 1, the prior art of record does not explicitly disclose an apparatus for adjusting texture within an arbitrarily shaped user defined region of a surface of an arbitrarily shaped 3D virtual object wherein a 3D GUI element rendered in 3D object space is used to adjust texture via at least one active location so that the texture is mapped on the arbitrarily shaped user defined region, which is less than the entire surface of the 3D object, of the surface of the arbitrarily shaped 3D virtual object without using geometric projection and without affecting a contiguous portion of the surface outside the user defined region, in combination with the further limitations of claim 1.

In reference to claims 2-9, 31-39, 45 and 47, these claims depend upon allowable claim 1 and are therefore also deemed allowable.

In reference to claim 10, the prior art of record does not explicitly disclose an apparatus for adjusting texture within an arbitrarily shaped user defined region of a surface of an arbitrarily shaped 3D virtual object wherein a 3D haptic GUI element rendered in 3D object space is used to adjust texture via at least one active location so that the texture is mapped on the arbitrarily shaped user defined region, which is less than the entire surface of the 3D object, of the surface of the arbitrarily shaped 3D virtual object without using geometric projection, without affecting a contiguous portion of the surface outside the user defined region and wherein the at least one active location is associated with haptic feedback, in combination with the further limitations of claim 10.

In reference to claims 11-22, 40, 46 and 48, these claims depend upon allowable claim 10 and are therefore also deemed allowable.

In reference to claim 23, the prior art of record does not explicitly disclose a method for adjusting texture within a user defined region of a surface of a 3D virtual object wherein a 3D GUI element rendered in 3D object space is used to adjust texture via at least one active location that is manipulated by a user of a graphical user interface device so that the texture is mapped on the user defined region, which is less than the entire surface of the 3D object, of the surface of 3D virtual object without using geometric projection, without affecting a contiguous portion of the surface outside the user defined region, in combination with the further limitations of claim 23.

In reference to claims 24-29 and 41, these claims depend upon allowable claim 23 and are therefore also deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
  - a. Kato et al. (U.S. Patent 5,369,736)
    - i. Kato et al. discloses a texture mapping method projecting a specification texture onto a 3D surface of an object.
